Engine parts in OEM quality

Agricultural machinery, marine vehicles, construction machinery, material-handling vehicles, industrial plant, trains and machinery for mining and raw material extraction are powered by engines that are mostly exposed to extreme loads. Due to these exacting requirements regarding the machines' endurance, regular maintenance and the replacement of wearing parts is a must.

As a result, the industry as a whole is especially interested in the rapid, comprehensive availability of superior-quality spare parts. Motor Service satisfies this requirement on a daily basis. As a major, renowned and high-performing spare parts supplier, we offer spare parts in OEM quality for many engines in this sector.

Wherever you are: We deliver quickly and reliably.

From north to south,
from east to west.
With sales partners
on five continents,
our products are
available all over
the world.
